

## Delta E-4 Coupe

# Electric PERFORMANCE

We've applied fundamental motorsport principles of minimizing weight, optimizing aerodynamics and maximizing mechanical efficiency to produce an all new battery electric car that delivers a phenomenal performance and handling experience.

*The Delta E-4 is different. It's better. Efficient.*

## GROUNDBREAKING

- It's FAST!
- 0-60mph in under 5 seconds (comparable to a Porsche 911 Turbo)
- Top speed of 150mph
- Center of gravity similar to single-seat race cars for extreme handling and braking
- Travel 200+ miles on a single charge
- Entire design meets European whole vehicle type approval

### Functional Sport Performance

- Carbon monocoque chassis and interior seating
- Modern flair with butterfly doors and simple, elegant, design
- Easy to use central display loaded with features
- Seats four adults with comparable size to a family car
- Rapid charge capable (<20min) or 8hrs using conventional wall plugs
- Clearly, it's British
